ABOUT ME

Experienced **React/Next.js** Developer with **4+ years** of building complex, high-performance web applications. Passionate about optimizing performance(Lighthouse audits, bundle size reduction, lazy loading, code splitting), enhancing UX through advanced **animations**(GSAP, Framer Motion, CSS animations), and improving **loading speeds**. Strong understanding of modern front-end architectures, including **SSR**, and dynamic rendering.

EXPERIENCE

| Company | Experience |
|-----------------------------------|--|
| Faifly | <p>1 year. Worked on multiple client projects using React, Angular, and Vanilla JS. Tasks included developing and maintaining admin dashboards, time-tracking tools, and internal business systems. Collaborated with designers and backend developers, followed agile processes, and used Git for version control. Focused on clean UI, responsive design, and API integration.</p> |
| IT Craft | <p>1.5 years. Built and optimized production-ready web applications using React, Next.js, and Vanilla JS. Delivered complex features for admin panels, project/time management systems, and client portals. Applied best practices like component architecture, code splitting, SSR, and performance optimization. Wrote unit and integration tests (Jest, React Testing Library), conducted code reviews, and participated in planning and estimations. Collaborated closely with product owners, designers, and backend teams.</p> |
| Digitality agency | <p>1.5 years. Contributed to a wide range of client projects, including custom web apps, business dashboards, and CMS-driven websites. Used React, Next.js, and vanilla JavaScript to build responsive, scalable frontends. Implemented features like role-based access, data visualization, and API integration. Worked with headless CMS platforms (e.g., Strapi, Contentful) and ensured clean, maintainable code. Took part in code reviews, performance tuning, and cross-functional collaboration with design and backend teams. Regularly followed Agile processes and delivered features in iterative sprints.</p> |
